ADDITIONAL INFORMATION

PROJECTS

Mini Project-Automatic Side Stand Retrieving System The new system Automatic Side Stand Retrieving System is designed based on the working principle of bikes. Since all bikes transmit power from the engine to the rear wheel by means of chain drive. Since the designed setup is kept in between the chain drive, the setup rotates and the side stand gets retrieved automatically.

Eyeism The objective of our project is to make people blink their eyes to eradicate Astigmatism. For that, we made an eyeglass, and with the use of an Eye Blink Sensor we are going to sense the number of eye blinks. If the count does not meet the required number of blink times if not then the LED flashes.

My Portfoilo Discover a captivating fusion of creativity and functionality in my front-end web development portfolio. Explore visually stunning designs, seamless user experiences, and innovative solutions that bring digital visions to life.
